## **DETAILED ACTION**

#### Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-8, drawn to a tool, classified in class 249, subclass 2.
  - II. Claims 9-18, drawn to a method for forming a surface, classified in class 404, subclass 72.
- 2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product could be placed on a surface and material could be injected into the forming surface through the hole (i.e., "pressure-relief element").

- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 4. During a telephone conversation with Terrence Brown on April 27, 2004 a provisional election was made without traverse to prosecute the invention of I, claims 1-8. Affirmation of this election must be made by applicant in replying to this Office action. Claims 9-18 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

## Information Disclosure Statement

5. The information disclosure statement filed 2/27/2004 fails to comply with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed that is not in the English language. It has been placed in the application file, but some of the information referred to therein, specifically the patents without an English language translation, has not been considered.

## Specification

6. The abstract of the disclosure is objected to because it refers to the purported merits of the invention. Correction is required. See MPEP § 608.01(b).

# Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 8. Claims 1-4, 6 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Lowe (U.S. Patent 5,320,790).

Lowe discloses a stamp (Figure 17, for example) having a forming surface (20) provided thereon. The forming surface has an interior for forming a semi-solid material into a predetermined shape and an exterior (Figure 18, for example). There is a pressure-relief element (30), which is sized and configured for air movement, provided adjacent the forming element.

Application/Control Number: 10/625,852

Art Unit: 3671

The pressure-relief element includes a hole (Figure 18, for example), which is configured for equalizing interior and exterior pressure.

The forming element (20) includes truncated domes (Figure 18, for example) arranged in aligned columns (Figure 17, for example).

# Claim Rejections - 35 USC § 103

- 9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 10. Claims 5 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lowe, as applied above.

Lowe does not teach the truncated cone shape; however, it is well known to use a truncated dome shape for the surface of a tactile warning surface. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have used a truncated dome with the tool of Lowe in order to obtain a desired configuration of the surface. Additionally, since it is standard practice in molding to utilize different shapes in order to configure articles having various configurations, a change in shape is not patentably distinguish the apparatus in this instance.

Regarding claim 8, Lowe is silent regarding the relationship between column spacing a wheelchair tire width; however, since Lowe is specifically concerned with walkway safety, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have used the spacing as claimed in order to improve safety.

Application/Control Number: 10/625,852

Art Unit: 3671

## Conclusion

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gary Hartmann whose telephone number is 703-305-4549. The examiner can normally be reached on Monday through Friday, 9am-6pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Will can be reached on 703-308-3870. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
